

Reducing 'Avoidable Harm' in Your Care Home - 21st November 2018 Workshop Feedback

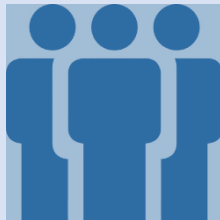

59 delegates attended the half-day workshop

35 organisations from across GM were represented

26 different professional groups including managers, team leaders, clinical leads, nurses and care assistants attended the interactive event.

19 causes of 'avoidable harm' to care home residents were identified by delegates during a brainstorming exercise.

1st Falls

2nd Malnutrition &

Pressure Sores

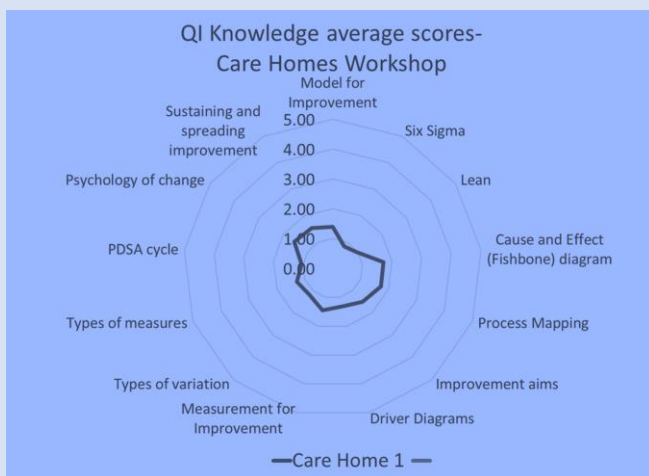

3rd Acute Illness

Medications &

Hand Over

Opportunity for improving knowledge of QI methodology within this sector of health and social care provision is evident from the summary feedback data.

264 Network connections facilitated during event

Next Steps:

- Trial of 'Safe Steps' app. within nominated providers
- Subsequent event planning with GM Care Home lead showcasing local QI initiatives
- QI work with individual care homes
