We are Health Innovation Manchester

Health Innovation Manchester (HInM) was formed in October 2017 by bringing together the Academic Health Science Network and Academic Health Science Centre under one single umbrella, which also represents Greater Manchester's wider research and innovation system.

Health Innovation Manchester has a pivotal role in bringing forward a constant flow of innovations that meet the Greater Manchester population health needs and helping them through an effective, but streamlined evaluation process so they are adopted at pace and scale across our 10 localities.

We have the unique ability to deliver innovation into frontline care at pace and scale thanks to our £6bn devolved health and social care system, unrivalled digital assets and ambitions, exceptional academic and research capability and thriving industry partnerships.

Work at the forefront of healthcare innovation

Health Innovation Manchester works at the forefront of healthcare innovation to discover, develop and deploy new healthcare solutions. We harness the power of the NHS, wider health and care system, industry and academia within our region to address major challenges and tackle inequalities.

We are fast-becoming an international leader in health innovation and digital healthcare, transforming the health & wellbeing of citizens across Greater Manchester. Partnership is the core of our work and through strong relationships and collaborative working we bring together expertise from across the system to turn great ideas into healthcare solutions. From clinical trials to digital tools, academic research to healthcare analytics, our work is wide-ranging, exciting and makes a difference to people's lives.

About Health Innovation Manchester

Health Innovation Manchester is rapidly becoming a recognised international leader in accelerating innovation and digital healthcare solutions that transform health and wellbeing.

Health Innovation Manchester has developed over the last four years to create a world-leading integrated health science and innovation system, bringing together the Academic Health Science Network (AHSN), the Academic Health Science Centre (AHSC) and the NIHR Applied Research Collaborative (ARC) and with deep digital and industry expertise under a single umbrella.

We harness these capabilities through our innovation pipeline which takes ideas, develops them, tests them in partnership with health and care providers and deploys them at scale.

This approach has never been more important than during the COVID-19 pandemic, where we have been able to make progress in months rather than years, accelerating many of our existing plans to benefit citizens, staff and the wider system. The scale and impact of Greater Manchester's collective research and innovation response is outlined fully within our [COVID-19 impact report](#).

Our work attracts interest from all over the world from innovators and places wanting to improve outcomes for their citizens, do business in Greater Manchester and learn from our work.

We work with innovators to discover, develop and deploy new healthcare solutions, bringing together health and care providers, industry and academia to address major health and care challenges and tackle inequalities.

A forward-looking place to work

Health Innovation Manchester is hosted by Manchester University NHS Foundation Trust (MFT), one of the largest acute Trusts in the UK, employing over 28,000 staff and brings together the best of the NHS with a culture that champions new ideas and innovation.

We're based at Citylabs, a world-class hub for health innovation and precision medicine; part of Europe's largest clinical academic campus. It's a great place to work, with easy access to Manchester City Centre and surrounded by health and university facilities.

We've embraced agile working, with staff combining on-site and remote working.

This means that we can come together when it matters most and promote a healthy work-life balance.

Our culture is inclusive and welcomes anyone with a passion for innovation and a desire to make a difference. We are committed to promoting equality of opportunity, celebrating and valuing diversity.

Health Innovation Manchester believes that successful implementation of equality, diversity and inclusion in all aspects of work ensures that colleagues are valued, motivated and treated fairly. In 2019, Health Innovation Manchester signed up to the AHSN Network's diversity and inclusion pledges.

Citylabs

Our Aims

1. Ensure a constant innovation pipeline flows into health & social care
2. Prioritise & monitor innovation activities that meet the needs of Greater Manchester
3. Accelerate delivery of innovation into health, care and wellness delivery
4. Amplify existing academic & industry value propositions
5. Influence national & international policy

Our Vision

Be an international leader in accelerating innovation to improve the health and wellbeing of our 2.8 million citizens

Our Purpose

Connect research, academia and industry with the health & care system to develop a constant flow of innovations and deploy them into frontline care

Our Culture: Values

Our Values & Behaviours were designed and created with various staff engagement groups and collaboration across the organisation.

We wanted everyone to have their say on the HInM culture and input their ideas and suggestions so they could be reviewed collectively.

Following the engagement sessions, all staff then voted on their top 5 Values which were agreed by the Executive Team and launched in May 2019

Visionary

Embracing a culture of creative thinking, seeking out innovations through extreme collaboration

Citizen-focussed

Ensuring patients and service users are at the heart of all activity undertaken and that we listen and learn from their experience

Respect

Consideration for the feelings, contributions, values and rights of all colleagues

Everyone matters

A sense of belonging to the organisation, creating an environment where there is equality by taking into consideration everyone

Accountability

Being responsible and taking control of what you do. Having the ability to stand by decisions made, creating a culture of celebration and learning.

Apply for a role

All of our current roles can be found on our website:

<https://healthinnovationmanchester.com/work-for-us/>

Here, you'll find more information about working for us, full details of the role and how to apply.

The job information pack contains contact details of the person leading the recruitment of the role, who can be contacted if you have any questions.

We work with Manchester University NHS Foundation Trust to recruit and your job application takes place on the Trac system.

Simply create an account and start your application.
