**Cottonopolis to metropolis..**

I am not a native of Manchester. When I

arrived in the city I admit that I found it was a place whose riches were not readily apparent. But as I dug, the more I found, and even recently as I have been preparing to take on my new role I have dug deeper, and found more and more...

## News & Updates

Lord O'Shaughnessy

### Lord O'Shaughnessy visits Manchester

Lord O'Shaughnessy, (Parliamentary Under Secretary of State at the Department of Health) visited Manchester on Monday 19 February to see how health innovation taking place here is aligning with the Government's Life Sciences Strategy, and driving forward research to improve our health services and our economy.

He met privately with our CEO Ben Bridgewater to discuss the devolution difference and saw detailed examples of our successful industry-facing healthcare innovation projects, such as the COPD step-down programme, ERAS+ and the Rainbow Clinic.

## Health Innovation Manchester hosts IPMC event

As part of our wider partnership working, Health Innovation Manchester is formulating a sub-committee of the Board, whose primary focus is to streamline processes in identifying and adopting innovative ideas.

In this regard, an Innovation, Prioritisation & Monitoring Committee event was held on 5th February to bring together key influencers and stakeholders from a wide range of constituencies to help shape the membership of this committee and its structure.

Thought-provoking and inspiring talks were given by key figures including Professor Ian Greer and Ruth Boaden, as well as presentations of the HInM exemplar projects.

The event received some excellent feedback and delegates said they left feeling inspired and motivated to move forward at pace.

The first IPMC committee meeting is scheduled to take place in March. You can see all the comments from the recent event under the Twitter hashtag #IPMC.

## Opportunities and support

### Launch of NHS Test Beds- Wave 2

Following the announcement by NHS England's Chief Executive Simon Stevens at Expo last September, the second wave of the NHS Test Beds programme launched this week.

The Test Beds programme provides funding and support to NHS organisations and industry to test combinations of technology and pathway innovation to tackle some of the biggest challenges facing the health service.

Up to £4.5 million will be available from the Office for Life Sciences for the second wave of Test Beds, with individual projects receiving between £500,000 and £1.5 million.

### Digital health businesses called on to solve NHS challenges

Digital health businesses from across the country can compete to join a new Greater Manchester Digital Health Accelerator, launched to help develop and deploy digital solutions to some of the most pressing challenges facing the NHS.

The new programme will work with local companies to match their products to NHS needs. By speeding up access to the latest digital technologies, the Accelerator will ensure that thousands of people across Greater Manchester benefit from the latest technologies to improve their health and that high potential companies grow faster, supporting economic growth in the area.

## G4A Generator looking for self-care innovations

After running its G4A (Grants4Apps) program in Berlin for five years, Bayer is launching a new accelerator program in the United States.

Their US Consumer Health G4A Generator program is now focusing on self-care and making it truly accessible and achievable for consumers. They are looking for like-minded innovators to help fulfill the potential of self-care in the following areas: nutrition support, sun and skin protection, pain management and self-care solutions.

## Events

**Maternity & Neonatal Learning System launch**

## Monday 12 March

Health Innovation Manchester's Patient Safety Collaborative wish to invite you and members of your maternity and neonatal team to the launch event of the Maternity and Neonatal Learning System.

The Learning System aims to create a safe space so people can learn from and with each other to define what works and why; cutting through hierarchy and bureaucracy and rapidly spreading innovation. We would like to invite representation from across the maternity and neonatal workforce, particularly frontline doctors, midwives, nurses and support workers.

## Health data privacy and regulation: who has the power over personal health data? Thursday 15 March

Will the European Union's General Data Protection Regulation (GDPR) (which becomes effective May 25) give power over personal data back to the person? What can we expect from organisations managing our health data?

At this event we will hear insights from patients and members of the public with strong expertise in this area as well as from an expert in Information Governance and data privacy.
